25X1 3. [] and I met with Guy McConnell, 25X1A
Senate Appropriations Committee staff, accompanied by [] IC Staff, 25X1A
and went over the action taken by the House on the [] 25X1A
bill and McConnell indicated the Chairman had expressed his desire to show
25X1 a cut of [] and McConnell indicated he was going to restore some
25X1 of the cuts made by the House committee but would have to make other cuts
to arrive at the [] figure. [] is to call him back tomorrow 25X1A
morning to give him some suggestions on this.

25X1 4. [] Bill Hogan, Counsel, House Armed Services
Committee, called to advise us that Chairman Lucien N. Nedzi's (D., Mich.)
Special Subcommittee on Intelligence will hold a hearing on S. 2714 (CIARDS
cost of living amendment) at 10:00 a.m. on Tuesday, 4 December in room 2337
Rayburn House Office Building. In response to his request, I told him that
25X1 [] Acting Director of Management and Services would be the
Agency's witness. Hogan asked for two dozen copies of our prepared statement
for the Committee's use, which I said we would bring. Hogan believes this
will be strictly a pro forma appearance. In response to my query, he said the
only question he could think of which might require some preparation would
involve the status of the CIA Retirement Fund. Messrs. [] 25X1
were advised and we are drafting a proposed answer to a question on the Fund
25X1 which we expect to review with [] on Monday.

25X1 5. [] In my conversation with Guy McConnell, Senate
Appropriations Committee staff, I mentioned that our situation with the
Renegotiation Board was not quite as clear cut as I had understood in my
conversation with him earlier and it was possible that we might have to
accede to their claim of jurisdiction over surplus profits from the sale of
SAT. I told him we were going to resist this to the extent we felt we reason-
ably could. McConnell is in agreement with this approach to the matter.

I also mentioned to McConnell the Thomasson article in today's
Washington Star-News and the fact that while we did not know precisely what
Thomasson was getting at, some of the statements in the article came fairly
close to factual situations and I briefed him on the [] 25X1

[] project.
